

CAREER-FIT

Don't let careers guidance become a forgotten topic!

It's now more important than ever help your students assess their strengths, explore the right careers and majors, and make successful school-to-career transitions. Early career planning increases students' motivation, persistence as well as schools' retention rate.

PET-Xi Career-fit is a comprehensive career planning and guidance process that can be completed totally online and supported with free resources for school's careers lead.

We use a combination of psychometric tools and coaching techniques. This results in a step-by-step process that the student can complete either on their own, with a professional advisor, parent or tutor, or in virtual groups/classes.

Key Features

- ★ Available for use remotely either in the classroom or at home.
- ★ Uses the latest technology and techniques to deliver personalised vocational advice and guidance
- ★ Can be used to evidence that each student's needs are being addressed with a totally personalised solution.
- ★ Provides students with a structure to build their self-awareness and confidence to take control of their career choice journey.
- ★ Totally scalable and suitable for individuals or full year groups and available immediately.
- ★ Can be used either on its own or in support of existing career guidance activities.
- ★ Provides exercises that show how to maximise the benefits available from using the feedback reports.
- ★ Provides teachers and guidance professionals with information that allows them to improve the depth and range of support provided in a highly time effective manner.

£27.95^{+VAT} per assessment
