

KS2 Topic Focus Options

The Topic Focus revision menu offers a range of one to three day options designed to cover elements of the syllabus.

Each option takes learners through an exciting and engaging series of activities to improve their skills. They embark on a range of written and kinaesthetic activities to improve their attainment, as well as participating in short, motivational exercises to embed their understanding.

All courses can be adapted to suit the age and ability of learners to improve their performance. Topic Focus Options are perfect for schools where teachers can identify and isolate areas for improvement and wish to focus wholly upon them. Courses come with a pre-and post Confidence Test, so learners and teachers can evidence the progress made.

There are three set options available, as well as the option to select a bespoke programme from a credit based menu, for a small additional cost.

Option A (Arithmetic focus)

- Place value, addition, subtraction, worded arithmetic, multiplication, division, time scales, written arithmetic skills.

Option B (Number focus)

- Negatives, special numbers, sequences, decimals, fractions, percentages, averages, written arithmetic skills.

Option C (Shape and Data Handling focus)

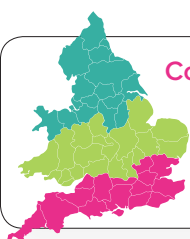

- Properties of shape, measure, charts & graphs, area & perimeter, unit conversion, volume, written arithmetic skills.

KS2 Reasoning Focus

This 1-day programme is targeted at learners who have a good understanding of the skills, but require more practice at reasoning style questions, where maths is more embedded in context. This programme covers a range of topic areas, with exam-style questions and is an excellent way of practising problem solving skills.

KS2 Written Arithmetic Focus

This 1-day programme is targeted at learners who require more practice with written arithmetic methods, which can be utilised in both the reasoning and written arithmetic national curriculum tests. This programme covers a wide variety of written arithmetic methods from standard addition, subtraction, multiplication and division through to percentage, decimals, fractions and averages.
