

Key Stage 2 Programmes

KS2 Booster

This five day course is perfect for KS2 learners preparing for their end of Key Stage National Curriculum Test in Mathematics.

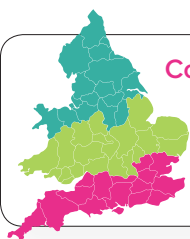

The course begins and ends with a full sitting of an actual KS2 National Curriculum Test and the officially provided sample materials, in both reasoning and written arithmetic. These are then marked and verified by our trained PET-Xi markers and extensive reports provided, so that schools can demonstrate learner progress clearly and reliably.

The main body of the course concentrates on all areas of the National Curriculum Syllabus and are differentiated to ensure all learners are suitably challenged.

Combining this academic expertise with the PET-Xi methodology of active learning, quizzes, games, prizes, raffles and lots of fun, learners make progress in leaps and bounds. The course also comes with reassurance of the PET-Xi promise.

"I'd like to thank you for sending us such fabulous people to work with the children. They're always cheerful and full of enthusiasm. They're making the "hard bits" worth it because they're making it fun - seems to be the general consensus from the children doing the programme."
